

## Introducing the Mattingly 60mm Cube Dome

Item # M60Cube

The NEW Mattingly cube dome is 60mm, 2.6x and has a concave base to prevent scratching. The square design is easier to grasp than traditional domes, and you may find that this shape will help your clients track lines better - which helps improve reading speed and comprehension.

*This lightweight acrylic cube dome provides you with more options for your clients – which is never a bad thing!*
